With over 20 years of experience, Gürsözler provides efficient vehicle conversion solutions under the StyleBus brand.

Operating in a 12,000 m^2 production facility, we specialize in transforming Mercedes-Benz Sprinter, Vito and V-Class into fully optimized transport solutions tailored to professional use.

Our approach combines engineering precision with practical design to ensure durability, operational efficiency and long-term performance.

All vehicles are produced in compliance with ISO 9001 and European type approval standards.

StyleBus stands for reliability, consistency, and long-term value for professional transport operations.

OUR MODELS

Each StyleBus model is developed to meet real operational needs. From chassis-based solutions to tourism and city transport vehicles, our range focuses on reliability, efficiency, and long-term usability.

Our vehicles are designed for professional operators such as tourism companies, shuttle services, airport transfers, and corporate transport providers.

With optimized layouts, durable materials, and practical design solutions, we ensure consistent performance in daily use.

Every detail is engineered to support both passenger comfort and operational efficiency.

“Strength in every line, comfort in every seat.”

Mercedes-Benz Sprinter Chassis Tourism Bus

	PLACES (SEATS)	**9+1 - 29+1+1**
	ENGINE	**Euro 6**

⟷	LENGTH	**7900mm - 8050 mm**
↕	HEIGHT	**3200 mm**
⟷	WIDTH	**2300 mm**
	WHEELBASE	**4325 mm**
KG	MAX. WEIGHT	**7500 kg**

A flexible chassis-based platform designed for customized transportation solutions, offering durability, adaptability, and long-term operational reliability.

Reliable Exterior Build

Durable Rear Structure

Lift System Integration

Spacious Rear Cargo Space

Easy Access Design

Spacious and ergonomic interior layout designed to maximize passenger comfort while maintaining efficient seating capacity.

Carefully designed seating details and interior elements that enhance both passenger experience and overall cabin harmony.

Integrated control systems, driver-focused cockpit design, and advanced interior components developed to ensure ease of use, safety, and operational efficiency.

Mercedes-Benz Sprinter Tourism Bus

Designed for operators who prioritize passenger comfort without compromising operational efficiency, the StyleBus Tourism Bus offers a reliable solution for long-distance and daily transport needs.

Ideal for tourism operators, airport transfer providers, and shuttle service companies, this model combines spacious interiors, ergonomic seating, and practical design features to ensure a smooth and consistent travel experience.

Spacious passenger cabin designed for maximum comfort, with ergonomic seating and a well-balanced interior atmosphere.

Refined interior details including lighting, seat finishing, and material quality, all designed to enhance passenger comfort and overall travel experience.

Driver-focused cockpit designed for comfort, visibility, and ease of control in daily operations.

Clean and modern interior layout ensuring passenger comfort, efficient space usage, and a consistent travel experience.

Different configurations of the same platform, adapted for varying operational needs.

Flexible access and functional details designed to support practical and efficient use.

Versatile interior concepts designed to adapt to different operational expectations and service standards.

Alternative interior configurations offering flexibility in layout, seating capacity, and passenger experience.

Clean and functional rear design ensuring durability and easy maintenance.

Balanced exterior proportions designed for stability, efficiency, and visual consistency.

Spacious and well-organized rear luggage system designed for efficient loading, easy access, and reliable use in daily operations.

Mercedes-Benz Sprinter City Bus

Designed for urban transport operations, the StyleBus City Bus delivers a reliable and efficient solution for high-frequency, daily use.

Ideal for municipal transport, staff shuttles, and urban mobility services, this model focuses on passenger flow, accessibility, and operational efficiency.

With a functional interior layout and durable components, it ensures consistent performance under demanding city conditions.
Built to handle intensive use, it delivers long-term reliability.

Compact body structure designed for easy maneuverability and efficient operation in narrow urban streets.

Strong and balanced exterior stance ensuring visibility, stability, and a professional city transport presence.

Functional design elements supporting accessibility and efficient passenger movement.

Open and efficient interior layout designed to support high passenger flow and standing capacity in urban transport.

Optimized interior space ensuring easy movement, accessibility, and safe passenger distribution.

Durable and functional interior solutions designed for intensive daily use, ensuring reliability, easy maintenance, and long-term performance in urban transport operations.

BUILT FOR REAL OPERATIONS

Designed for long-term performance.

StyleBus delivers reliable transport solutions you can depend on every day.
